**Special Meeting**  
**January 17,2016**

Members present: Chair David Radka, Vice Chair Michael Veneri,  
Secretary Bertram Schmitz, Andrea Woliver

Also Present: Owner Vaycheslav “Slavik” Foksha, Chuck Mandel

Ref: IWC 16-000R (83 West Shore Drive)

At 9:04 AM David Radka called to order a special meeting to conduct a site walk at 83 West Shore Dr. in Clinton. The building lot was a long narrow piece of property which contained some Woodland and a large amount of rocks and boulders. The back of the property has a small running stream (enclosed pictures).

Mr. Mandel conducted the narration for the site walk starting with a description and location of the septic system and possible design of the septic system. As we move through this site Mr. Mandel said that some boulders are going to have to be removed but the process has not been decided upon. As we move to the back of the site we noticed that the ground is a little spongy and that some water was pooling in one location. We made our way to the back line and observed the stream. there was a fairly nice running stream with clear water on not particularly wide maybe 3 feet. Near the stream there is a curious bunch of little pink flags which nobody could identify. With no more questions and nothing else to see Mr. Radka closed the meeting at 9:22.
