

TOWN OF CLINTON DEPARTMENT OF PUBLIC WORKS

SERVICES

The Department of Public Works provides a number of services to the Town. It is the mission of the Department to provide these services to help maintain and enhance the quality of life for are residents.

Road maintenance:

The department of Public Works oversees approximately 78 miles of roads. Roads are swept once a year at the end of the winter to remove sand and winter debris. Roads are routinely checked for damage and pot holes. The Department also maintains all traffic control signs and street signs and performs right of way maintenance (brush and tree clearing along the sides of the roads)

Sidewalk maintenance:

The Department works on maintaining sidewalks in town. We do not have the manpower and equipment needed to provide snow removal for every sidewalk in Town but we do try and clear the critical walks around schools and in the center of town. We have also cleared the sidewalks of overhanging branches and brush to make them easier to use.

Sidewalk installation:

The Department provides sidewalk construction services to the Town when funds become available based upon a priority set by the Board of Selectmen. Recent work includes the Elliot School and Pearl Street Projects. We are currently seeking permits to install new sidewalks on Hull Street and Route 1 from Hull Street to John St Ext.

Construction services:

During our construction season we work on repairing roads, sidewalks and drainage systems. Each year work is scheduled based upon priorities. Budget restrictions prevent the Department from accomplishing everything it would like to do but in the past several years we have managed to complete a number of projects.

Completed Projects: 2008-2010

Jared Elliot Middle School front sidewalk replacement	Completed
Fairy Dell Road drainage improvements	Completed
Nod Place Drainage project	Completed
Woodland Drive drainage upgrade	Completed
